Chapter 7 & 8 - Human Health and Diseases and Immunology

1. Select the correct statement from the given below. [AIPMT 2010]
   a) Barbiturates when given to criminals make them tell the truth
   b) Morphine is often given to persons who have under gone surgery as a pain killer
   c) Chewing tobacco lowers blood pressure and heart rate
   d) Cocaine is given to patients after surgery as it stimulates recovery
2. Match the following [AIPMT 2008]

Column I	Column II
A) Amoebiasis	i) Treptonema pallidum
B) Diphtheria	ii) Use only sterilized food and water
C) Cholera	iii) DPT vaccine
D) Syphilis	iv) Use oral rehydration therapy

	A	B	C	D
a)	i	ii	iii	iv
b)	ii	iv	i	iii
c)	ii	I	iii	iv
d)	**ii**	**iii**	**iv**	**i**

3. If a person shows production of interferons in his body, the chances are that he has got an infection of
   a) Typhoid **b) Measles**
   c) Tetanus d) Malaria
4. A person suffering from a disease caused by Plasmodium, experiences recurring chill and fever at the time when? [AIPMT MAINS 2010]
   a) The sporozoites released from RBC's are being rapidly killed and broken down inside spleen
   b) The trophozoites reach maximum growth and give out certain toxins.
   c) The parasite after its rapid multiplication inside RBC's reptures them, releasing the stage to enter fresh RBC's
   d) The microgametocytes and megagametocytes are being destroyed by the WBC's
5. Where will you look for the sporozoites of the material parasite? [AIPMT PRE 2011]
   a) Red blood corpuscles of humans suffering from malaria
   b) Spleen of infected humans
   c) Salivary glands of freshy moulted female anopheles mosquito
   d) Saliva of infected female anopheles mosquito
6. Which one of the following organisms is scientifically and correctly named, correctly printed according to the International Rules of Nomenclature and correctly described? [AIPMT MAINS 2012]
   a) Plasmodium falciparum – a protozoan causing the most serious type of malaria.
   b) Felis tigris – The Indian tiger is well protected in Gir forests
   c) E. Coli – The full name is Entamoeba coli, a commonly occurring bacterium in human intestine
7. Which of the following endoparasites of humans does show viviparity? [AIPMT 2015]
   a) *Ancylostoma duodenale*
   b) *Enterobius vermicularis*
   c) Trichimella spiralis
   d) *Ascaris lumbricoides*
8. The active form of *Entamoeba histolytica* feeds upon: [AIPMT 2015]
   a) Erythrocytes, mucosa and submucosa of colon
   b) Mucosa and submucosa colon only
   c) Food in intestine
   d) Blood only
9. Which one of the following statements is correct with respect to AIDS? [AIPMT PRE 2010]
   a) The HIV can be transmitted through eating food together with an infected person
   b) Drug addicts are least susceptible to HIV infection
   c) AIDS patients are being fully cured 100 percent with proper care and nutrition
   d) The causative HIV retrovirus enters helper T-lymphocytes thus reducing their numbers
10. Select the correct statement with respect to diseases and immunization [AIPMT MAINS 2011]
    a) If due to some reason B and T lymphocytes are damaged, the body will not produce antibodies against a pathogen
    b)Injection of dead/inactivated pathogens caused passive immunity
    c) Certain protozoans have been used in mass production of hepatitis B vaccine
    d) Injection of snake antivenom against snake bite is an example of active immunization
11. Which one of the following statements is correct with respect to immunity? [AIPMT MAINS 2012]
    a) The antibodies against small pox pathogen are produced by T – lymphocytes
    b) Antibodies are protein molecules each of which has four light chains
    c) Rejection of a kidney graft is the function of B – lymphocytes
    d) Preformed antibodies need to be injected to treat the bite by a viper snake.
12. Which one of the following is not a property of cancerous cells whereas the remaining three are? [AIPMT PRE 2012]
    a) They compete with normal cells for vital nutrients
    b) They do not remain confined in the area of formation
    c) They divide in an uncontrolled manner
    d) They show contact inhibition
13. At which stager HIV infection does one usually show symptoms of AIDS? [AIPMT 2014]
    a) Within 15 days of sexual contact with an infected person
    b) When the infected retro virus enters host cells
    c) When HIV damages large number of helper T- Lymphocytes
    d) When the viral DNA is produced by reverse transcriptase
14. Match each disease with its correct type of vaccine [AIPMT 2015]
