- *Explains the reasons of transmission and prevention of STDs.*
- *Highlights the reasons of infertility.*
- *Develops a positive and healthy attitude towards reproductive life.*

8VER8V

Reproductive health represents a society with people having physically and functionally normal reproductive organs. Healthy people have healthier babies and are able to care for their family, and contribute more to the society and community. Hence, health is a community issue. Reproductive system is a complex system controlled by the neuro-endocrine system, hence, it is important to take necessary steps to protect it from infectious diseases and injury.

3.1. Need for reproductive health-Problems and strategies

India is amongst the first few countries in the world to initiate the **'Family planning programme'** since 1951 and is periodically assessed every decade. These programmes are popularly named as '**Reproductive and Child Health Care** (RCH). Major tasks carried out under these programmes are:

- Creating awareness and providing medical assistance to build a healthy society.
- Introducing sex education in schools to provide information about adolescence and adolescence related changes.
- Educating couples and those in the marriageable age groups about the available birth control methods and family planning norms.
