budgets, improve air quality, and curtail noise pollution. Trees, herbs, shrubs and grasses arrest sedimentation and prevent other pollutants from entering our water systems. This will give a chance for our urban lakes and rivers to recover and help improve aquatic ecosystems. Biodiversity also gets a boost through the urban forests and helps create corridors connecting the forest areas. High biodiversity areas can also help to build resilient ecosystems. Availability of forests within our urban areas gives an opportunity for children to connect to the natural environment and learn about native species.

Grammar

TENSES

You have learnt the use of Tenses in detail in class XI.

V - Verb
V1 - Present tense form

Tenses

V2 - Past tense form
