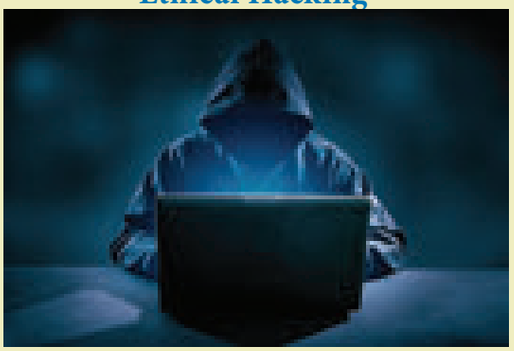
What you need to know about "Ethical Hacking"



Hacking generally refers to unauthorized intrusion into a computer or a network. The person engaged in hacking activities is known as a hacker. This hacker may alter system or security features to accomplish a goal that differs from the original purpose of the system. Hackers employ a variety of techniques.

How to safeguard?

To safeguard against hacking of personal data, it is suggested that the system should be installed with upto date Anti Virus. If the data is confidential in nature it is suggested that the system itself should be disconnected and made into a standalone the system. Don't click on popup windows as they would download harmful .exe files. Confidential Data such as Banking username, password, Aadhaar number, Pan number, Account number etc., should not be stored in the browser.

Grammar
