Writing

Describing a process

When we describe a process, we use a series of instructions to describe how we make or produce something or to elaborate how something is done.

When instructions are given as to how to make a particular dish, or to operate a machine or to perform an experiment, we use the imperative. The process can also be described using the passive voice.

Linkers are essential to join the different instructions together. Terms such as first, then, next, and then finally, are all used in the narration / descriptive process.

Study the sample paragraph describing the process of cleaning a flask.

Take a pinch of non-abrasive washing powder or washing soda and put it inside the flask. You could even use a mild cleaning liquid. In that case, pour a few drops of the cleaning liquid into the flask. Next, take a mug of hot water. Pour it into the flask, close it and shake well. Then clean the inner surface of the flask with a gentle brush.

Also clean the cap of the flask. Rinse well three or four times. Then allow the flask to dry. If there is an unpleasant odour, a pinch of sugar can be put into the flask and the flask could be cleaned properly with hot water.
