wound healed around his neck, his lower jaw became gripped in a mass of fibrous tissue. The only way this little boy could open his mouth was to raise his head. When I stopped by to see him after the race, he said, "You know, we won." And he was laughing.

11. The trolley's driver I knew better. A few years earlier, I had successfully closed a hole in his heart. He had returned to the hospital because he had a **malignant tumour** of the bone. A few days before the race, his shoulder and arm were **amputated**. There was little hope of his recovery. After the Grand Prix, he proudly informed me that the trolley's wheels were not properly oiled, but he was a good driver, and he had full confidence in the mechanic.

12. Suddenly, I realized that these two children had given me a **profound** lesson in getting on with the business of living. Because the business of living is joy in the real sense of the word, not just something for pleasure, amusement, recreation. The business of living is the celebration of being alive.

13. I had been looking at suffering from the wrong end. You don't become a better person because you are suffering; but you become a better person because you have experienced suffering. We can't appreciate light if we haven't known darkness. Nor can we appreciate warmth if we have never suffered cold. These children showed me that it's not what you've lost that's important. What is important is what you have left.

About The Author

Christiaan Neethling Barnard was born in rural South Africa in 1922 to poor parents as their fourth child. He evinced great interest in his academics and was determined to pursue medicine, after the loss of his brother to a cardiac ailment. He won many scholarships and pursued his higher studies specializing in cardiac surgery. As a cardiac surgeon, Barnard focussed on congenital and complicated cardiac conditions for which there was no cure at that time. After experimenting with heart transplantation on animals, he performed the world's first human-to-human heart transplant in the year 1967. He gained worldwide recognition and went on to develop many surgery techniques, which are being adopted till date. Barnard has penned fourteen books and 235 scientific articles that have been published in reputed journals. Some of his books are, 'One Life', '50 Ways to a Healthy Heart', 'The Best Medicine' and 'The Faith'. A pioneer in cardiac surgery, he obtained a Doctorate in Medicine from the University of Cape Town. This was followed by 11 honorary doctorates, bestowed upon him by universities all over the world. He has also received 36 International Awards. In his late years, he established the Christiaan Barnard Foundation to serve and promote the cause of underprivileged children throughout the world and died at the age of 78 in the year 2001.
