Routine accounting reports include

(a) Day books / Journal

(b) Ledger

(c) Trial balance

(d) Income statement

(e) Balance sheet

(f) Cash flow statement

Special purpose report is a report other than the routine accounting reports which is prepared according to the requirements of the user.

Following are the steps involved in designing accounting reports:

1. Define the objective of generating report
2. Specify the structure of the report
3. Creating database queries to interact with the database to retrieve, modify, add or delete data from the records.

10.5. Data exchange with other information system

A Management Information System (MIS) is a system that provides information for decision making at all levels of management. It includes manufacturing information system, marketing information system, human resource information system and accounting information system. Accounting Information System (AIS) collects financial data, processes them and provides information to the various users. To provide information AIS requires data from other information system that is manufacturing, marketing and human resources. Similarly, other information systems require data from AIS in order to provide information. Thus, data exchange among the information systems is inevitable. For example, to compute amount of wages to be paid, AIS requires data from manufacturing information system and human resource information system.

10.6. Application of computerised accounting system – Tally with GST package

Tally is one of the most widely used financial accounting softwares. It is used by various types of trade and industries. It is a comprehensive business accounting and inventory management software that provides various facilities like multi-lingual operations, online functions, legally supported reports, etc.

In 2009, Tally Solutions introduced the software Tally.ERP 9. The software offers comprehensive business management solution. It maintains all books of accounts. Different types of vouchers such as vouchers for receipt, payment, sales, purchases, etc., can be used for recording transactions. It follows the principle of double entry system of book keeping. In 2017, it was updated to comply with the Indian Goods and Services Tax (GST) requirements.
