(a) Partners' capital account

Capital account is credited with the original amount of capital introduced by a partner into the business and any additional capital introduced by him/her in the subsequent years. The account is debited with the amount of capital permanently withdrawn by a partner from the business. No other items are debited or credited to this account. Capital account will always show credit balance under this method. The balance of capital account remains the same unless any additional capital is introduced or capital is permanently withdrawn.

Format of partners' capital account under fixed capital method

		xxx	xxx			xxx	xxx

(b) Partners' current account

Partners' current account is prepared for recording all transactions between the partner and the firm other than initial capital introduced, additional capital introduced and capital permanently withdrawn. This account is credited with interest on capital, partner's salary or commission and share of profit to the partner. This account is debited with drawings, interest on drawings and share of loss of the partner. As a result, the balance in this account changes periodically. Current account may show either credit balance or debit balance.
