16. Secondary nitro alkanes react with nitrous acid to form

a) red solution b) blue solution c) green solution d) yellow solution

17. Which of the following amines does not undergo acetylation?

a) t – butylamine b) ethylamine c) diethylamine d) triethylamine

18. Which one of the following is most basic?

a) 2,4 – dichloroaniline b) 2,4 – dimethyl aniline

c) 2,4 – dinitroaniline d) 2,4 – dibromoaniline

19. When  is reduced with Sn / HCl the pair of compounds formed are

a) Ethanol, hydroxylamine hydrochloride b) Ethanol, ammonium hydroxide

c) Ethanol, . NH_2OH . d) $C_3H_5NH_2$, H_2O

20. IUPAC name for the amine

 is

a) 3 – Bimethylamino – 3 – methyl pentane

b) 3 (N,N – Triethyl) – 3- amino pentane

c) 3 – N,N – trimethyl pentanamine

d) N,N – dimethyl – 3- methyl - pentan - 3 amine

21.  + $CH_3MgBr \xrightarrow{H_3O^+}$ P Product 'P' in the above reaction is

a) 
b) 
c) 
d) 
22. Ammonium salt of benzoic acid is heated strongly with P_2O_5 and the product so formed is reduced and then treated with $NaNO_2$ / HCl at low temperature. The final compound formed is

a) Benzene diazonium chloride b) Benzyl alcohol

c) Phenol d) Nitrosobenzene
