EVALUATION

Choose the correct answer:

1. Which one of the following rotates the plane polarized light towards left? (NEET Phase – II)

   a) D(+) Glucose (b) L(+) Glucose (c)D(-) Fructose d) D(+) Galactose

2. The correct corresponding order of names of four aldoses with configuration given below Respectively is, (NEET Phase – I)1551

   K2Q7E6

   a) *L*-Erythrose, *L*-Threose, *L*-Erythrose, *D*-Threose

   b)*D*-Threose,*D*-Erythrose, *L*-Threose, *L*-Erythrose,

   c)*L*-Erythrose, *L*-Threose, *D*-Erythrose, *D*-Threose

   d) *D*-Erythrose, *D*-Threose, *L*-Erythrose, *L*-Threose

3. Which one given below is a non-reducing sugar? (NEET Phase – I)

   a) Glucose b) Sucrose c) maltose d) Lactose.

4. Glucose $\xrightarrow{(HCN)}$ Product $\xrightarrow{(hydrolysis)}$ Product $\xrightarrow{(HI + Heat)}$ A, the compound A is

   a) Heptanoic acid b) 2-Iodohexane c) Heptane d) Heptanol

5. Assertion: A solution of sucrose in water is dextrorotatory. But on hydrolysis in the presence of little hydrochloric acid, it becomes levorotatory. (AIIMS)

   Reason: Sucrose hydrolysis gives equal amounts of glucose and fructose. As a result of this change in sign of rotation is observed.

   a)If both accretion and reason are true and reason is the correct explanation of assertion

   b) If both assertion and reason are true but reason is not the correct explanation of assertion

   c) If assertion is true but reason is false.

   d) if both assertion and reason are false.

6. The central dogma of molecular genetics states that the genetic information flows from (NEET Phase – II)

   a) Amino acids ⟶ Protein ⟶ DNA

   b) DNA ⟶ Carbohydrates ⟶ Proteins

   c) DNA ⟶ RNA ⟶ Proteins

   d) DNA ⟶ RNA ⟶ Carbohydrates

7. In a protein, various amino acids linked together by (NEET Phase – I)

   a) Peptide bond b) Dative bond

   c) α - Glycosidic bond d) β - Glycosidic bond
