|---|---|---|
| **8) Antiseptics**<br>Examples<br>Hydrogen peroxide, povidone-iodine, benzalkonium chloride | Stop or slow down the growth of microorganisms – Applied to living tissue<br><br>**Uses**<br>To reduce the risk of infection during surgery and other procedures |  <br>Povidone-iodine |
| **9) Disinfectants**<br>Examples<br>Chlorine compounds, alcohol, Hydrogen peroxide. | Stop or slow down the growth of microorganisms – Generally used on inanimate objects |  <br>Hydrogen peroxide |
| **10) Antifertility drugs**<br>**Example**<br>**Synthetic oestrogen** - Ethynylestradiol, Menstranol<br><br>**Synthetic Progesterone** - Norethindrone, Norethynodrel | These synthetic hormones that suppresses ovulation/ fertilisation.<br><br>**Uses**<br>Used in birth control pills. |  <br>Ethynylestradiol |

## 15.2 Food additives:

Have you ever noticed the ingredients that is printed on the cover of the packed food materials such as biscuits, chocolates etc...You might have noticed that emulsifiers such as 322, 472E, dough conditioners 223 etc… are used in the preparation, in addition to the main ingredients such as wheat flour, edible oil, sugar, milk solid etc… Do you think that these substances are necessary? Yes. These substances enhance the nutritive, sensory and practical value of the food. They also increase the shelf life of food. The substances which are not naturally a part of the food and added to improve the quality of food are called food additives.
