Tetanus (Lock Jaw)	*Clostridium tetani*	Through injury	3-21 days	Degeneration of motor neurons, rigid jaw muscles, spasm , paralysis	Tetanus-antitoxins
Plague	*Yersinia pestis*	Indirect and inoculative (vector is rat flea)	2-6 days	Bubonic plague affects lymph nodes; Pneumonic plague affects lungs and Septicemic plague causes anaemia	Tetracycline, streptomycin, Chloromycetin

10.2.2. Viral Infections

Viruses are acellular obligate intracellular parasites. They contain only one type of nucleic acid, it may be either single or double stranded DNA or RNA. Viral diseases range from minor ailments such as the common cold to severe diseases such as Rabies and Acquired Immune Deficiency Syndrome (AIDS). They may be sporadic like Mumps, endemic like Infectious hepatitis, epidemic like Dengue fever or pandemic like Influenza.
