+2 PRACTICALS

DHSKIS

Important instructions

- The students are required to have an observation and a record note book
- The students are advised to use overcoat and safety glass in laboratory.
- They are not permitted to taste or touch any reagent. If any reagent falls on skin, it must be immediately washed with water.
- The students should not inhale any gas or vapour directly.
- To transfer any solutions use droppers and for salts use spatula. During heating of a test tube, the open end should not face any student.
- For any accident in lab, immediately report to the teacher - incharge.
- Follow the systematic procedure carefully during analysis.
- Try to understand the concept of Bio-chemistry in each test clearly.
- At the beginning and after finishing of each lab session wipe your bench tops using disinfectant solution.
- Never pipette any chemical reagents by mouth. Doing so is strictly prohibited .Pipetting is to be carried out with the aid of a mechanical pipetting device.
- Do not contaminate chemicals while doing experiments.
- Speak quietly and avoid unnecessary movement around the laboratory to avoid distractions that may cause accidents.
