2.	Concentration (µg)	-	20	40	60	80	100	-
3.	Distilled water (ml)	1	0.8	0.6	0.4	0.2	-	-
4.	Volume of Test Solution (ml)	-	-	-	-	-	-	1
5.	Indophenol (ml)	0.1	0.1	0.1	0.1	0.1	0.1	0.1
6.	DNPH (ml)	1	1	1	1	1	1	1
Keep it in the boiling water bath and warm it for 30 min								
7.	Volume of H_2SO_4(ml)	3	3	3	3	3	3	3
8.	Optical density @ 540nm							

Calculation:

1.0ml of the test solution corresponds to _____ µg of ascorbic acid

Therefore, 100ml of the test solution will contain 100 x $\frac{\text{_____}}{1.0}$ µg of ascorbic acid

= Z µg of ascorbic acid

Result:

Vitamin C content of the given 100ml of the test solution was found to be _____µg.
