

You will then be asked to drink a liquid containing a certain amount of glucose (usually 75 grams). Your blood will be taken again every 30 to 60 minutes after you drink the solution.

The test may take up to 3 hours.

More commonly, a modified version of the glucose tolerance test is used to diagnose gestational diabetes — a type of diabetes that develops during pregnancy.

EVALUATION

I. Choose the correct answer from the given four alternatives

1. How many NADHs are produced from 7.5 mol of acetyl CoA by the citiric acid cycle?

   a. 15 mol b. 7.5 mol

   c. 75 mol d. none of these

2. Blood sugar is

   a. Sucrose b. Lactose

   c. Glucose d. Fructose
