The Points of distinction between internal check and internal control are as follows.

S.No	Basis	Internal Check	Internal Control
1.	Meaning	A system of allocation of responsibility, division of work, and methods of recording transactions, whereby the work of an employee is checked continuously by another.	It consists of all the methods and procedures adopted to assist in achieving the objective of efficient conduct of business. It includes internal check and internal audit.
2.	Scope	It operates in routine to double check every part of a transaction at the time of occurrence and recording of the same.	In internal control systems, work of one person is automatically checked by another.
3.	Objective	Its objective is to ensure that no employee has exclusive control over any transaction or group of transactions and their recording in the books.	Its object is to ensure adherence to management policies, safeguarding of assets, prevention and detection of frauds and errors, accuracy and completeness of accounting records.
4.	Point of Time	Methods of recording transactions are devised where work of an employee is checked continuously by correlating it with the work of others.	In internal control system, checking is done simultaneously with the conduct of work. Every transaction is checked as soon as it is entered.
5.	Thrust of System	The thrust of internal check system is to prevent errors.	The thrust of internal control lies in fixing of responsibility and division of work to avoid duplication.
6.	Cost Involved	It is a part of internal control and a method of division of work, therefore does not add to the cost.	The system proves to be costly in case of small businesses because more number of employees are engaged.
7.	Report	The summary of day to day transactions work as report to the senior.	Internal control provide for built in MIS reports.
