LET US KNOW

Corona virus (COVID - 19) is a new virus which causes cold, cough, fever along with breathing difficulty in man. It was first identified during an investigation into an outbreak in Wuhan, China.

COVID - 19

MODE OF TRANSMISSSION:

This germ spreads 80% through hands (on touching surfaces contaminated with droplets) and 20% through air. It is directly transmitted through air droplets while coughing and sneezing.

PREVENTIVE MEASURES:

There is currently no vaccine and specific antiviral treatment for COVID-19.
The best way to prevent infection is to avoid being exposed to the virus that causes COVID-19 by maintaining Respiratory hygiene, Hand hygiene, Surface hygiene and through awareness.

1. Avoid close contact with people who are suffering from common cold and cough.
2. Avoid touching your eyes, nose, and mouth during epidemic outbursts.
3. Stay home when you are sick and use facemasks to help prevent the spread of the disease to others.
4. Wash your hands often with soap and water for at least 20 seconds. Clean and disinfect frequently touched objects and surfaces using a sanitizer.
5. Cover your cough or sneeze with your hands or a tissue, then throw the tissue in the trash.

ICT CORNER

Human Health and Diseases

Let us do examine to know the chronic disease - systemic lupus erythematosus (SLE)

Procedure :

Step -1 : Type the **URL** or scan the **QR** code to open the activity page. Click **"To enter the lab"** to start the test.

Step -2 : Follow the interactive steps guided by the virtual lab starting from centrifugation and to **ELISA**.

Step -3 : On the right, Find the different headers such as **"Diagnosis, Background, Notebook**, Glossary and **Help"** and **click** to know the virtual procedure happening aside on the left.

Step – 4 : Find **"Launch Gene Body"** on the right bottom of the window, and Click it to analyse and understand about the cloning.

Step -5: Complete this **ELISA** to know a patient acquired the disease or not.
