c) hCG, hPL, progesterone, prolactin
d) hCG, progesterone, estrogen, glucocorticoids

8. Match and select the correct option [NEET, 2018]

| Column I | Column II |
|---|---|
| a. Proliferative phase | 1. Breakdown of endometrium lining |
| b. Secretory phase | 2. Follicular phase |
| c. Menstruation | 3. Luteal phase |

| | a | b | c |
|---|---|---|---|
| A) | 3 | 2 | 1 |
| **B)** | **2** | **3** | **1** |
| C) | 1 | 3 | 2 |
| D) | 3 | 1 | 2 |

## Chapter 3 - Reproductive Health

1. Which of the following is a hormone releasing Intrauterine Device (IUD)? [AIPMT 2014]
   a) Multiload 375 **b) LNG-20**
   c) Cervical cap d) Vault
2. Assisted reproductive technology, IVF involves the transfer of [AIPMT 2014]
   a) Ovum into the fallopian tube
   **b) Zygote into the fallopian tube**
   c) Zygote into the uterus
   d) Embryo with 16 blastomeres into the fallopian tube
3. In context of amniocentesis, which of the following statements is incorrect? [NEET-I, 2016]
   a) It is usually done when a woman is between 14-16 weeks pregnant
   b) It is used for prenatal sex determination
   c) It can be used for detection of Down syndrome
   **d) It can be used for detection of Cleft palate**
4. Which of the following approach does not give the defined action of contraceptive? [NEET-I, 2016]

| | |
|---|---|
| a) Barrier methods | Prevent fertilization |
| b) Intra uterine devices | Increases phagocytosis of sperms, suppresses sperm motility and fertilizing capacity of sperms |
| c) Hormonal contraceptives | Prevent retard entry of sperms, prevent ovulation and fertilization |
| **d) Vasectomy** | **Prevents spermatogenesis** |

## Chapter 4 - Principle of Inheritance and Variation

1. The fruit fly *Drosophila* melanogaster was found to be very suitable for experimental verification of chromosomal theory of inheritance by Morgan and his colleagues because [AIPMT MAINS 2010]
   a) It reproduces parthenogenetically
   b) A single mating produces two young flies
   c) Smaller female is easily recognizable from large male
   **d) It completes the life cycle in about two weeks**
2. Which one of the following cannot be explained on the basis of Mendel's Law of Dominance? [AIPMT PRE 2010]
   a) The discrete unit controlling a particular character is called a factor
   b) Out of one pair factors one is dominant and the other recessive
   **c) Alleles do not show any blending and both the characters recover as such in F2 generation**
   d) Factors occur in pairs
3. ABO blood groups in humans are controlled by the gene I. It has three alleles – IA, IB and i. Since there are three different alleles, six different genotypes are possible. How many phenotypes can occur? [AIPMT PRE 2010]
   a) Three b) One **c) Four** d) Two
4. Which one of the following symbols and its representation, used in human pedigree analysis is correct? [AIPMT PRE 2010]
   **a) □=○=Mating between relatives**
   b) ○=Unaffected male
   c) □=Unaffected female
   d) ◊=Male affected
5. Which one of the following conditions correctly describes the manner of determining the sex in the given example? [AIPMT PRE 2011]
   **a) XO type of sex chromosomes determine male sex in grasshopper**
   b) XO condition in humans as found in Turner syndrome, determines female sex
   c) Homozygous sex chromosomes(XX) produce male in Drosophila
   d) Homozygous sex chromosomes(ZZ) determine female sex in birds
6. A normal-visioned man whose father was blind, marries a woman whose father was also colour blind. They have their first child as a daughter. What are the chances that this child would be colour blind? [AIPMT PRE 2012]
   a) 100% **b) 0%** c) 25% d) 50%
7. Which of the following statements is not true of two genes that show 50 per cent recombination frequency [AIPMT 2013]
   a) The genes may be on different chromosomes
   **b) The genes are tightly linked**
   c) The genes show independent assortment
   d) If the genes are present on the same chromosome
8. A pleiotropic gene: [RE-AIPMT 2015]
   a) Is a gene evolved during Pliocene
   b) Controls a trait only in combination with another gene
   **c) Controls multiple traits in an individual**
   d) Is expressed only in primitive plants
9. A gene showing codominance has: [RE-AIPMT 2015]
   a) Alleles tightly linked on the same chromosome
   b) Alleles that are recessive to each other
   **c) Both alleles independently expressed in the heterozygote**
   d) One allele dominant on the other
10. Pick out the correct statements: [NEET-I, 2016]
    a) Haemophilia is a sex-linked recessive disease
    b) Down's syndrome is due to aneuploidy
    c) Phenylketonuria is an autosomal recessive gene disorder
    d) Sickle cell anaemia is an X-linked recessive gene disorder
