4. Consider the following four conditions (A-D) and select the correct pair of them as adaptation to environment in desert lizards. [AIPMT PRE 2011]
The conditions:
A) Burrowing in soil to escape high temperature.
B) Losing heat rapidly from the body during high temperature
C) Bask in sun when temperature is low
D) Insulating body due to thick fatty dermis.
a) (A) and (C) b) (B) and (D)
c) (A) and (B) d) (C) and (D)

5. People who have migrated from the planes to an area adjoining Rohtang Pass about six months back [AIPMT PRE 2012]
a) Have more RBC's and their haemoglobin has a lower binding affinity to O_2
b) Are not physically fit to play games like football
c) Suffer from altitude sickness with symptoms like nausea, fatigue, etc.,
d) Have the usual RBC count but then haemoglobin has very high binding affinity to O_2

6. A biologist studies the population of eats in a barn. He found that the average natality was 250, average mortality is 240, immigration is 20 and emigration to be 30. The net increase in population is [AIPMT 2013]
a) 10 b) 15 c) 05 **d) Zero**

7. An association of individuals of different species living in the same habitat and having functional interaction is: [RE-AIMPT 2015]
a) Biotic community b) Ecosystem
c) Population d) Ecological niche

8. Gause's principle of competitive exclusion states that: [NEET – I, 2016]
a) More abundant species will exclude the less abundant species through competition
b) Competition for the same resources excludes species having different food preferences
c) No two species can occupy the same niche indefinitely for the same limiting resources
d) Larger organisms exclude smaller ones through competition

9. When does the growth rate of a population following the logistic model equal zero? The logistic model is given as dN/dt=rN(1-N/K): [NEET – I, 2016]
a) When N/K is exactly one
b) When N nears the carrying capacity of the habitat
c) When N/K equals zero
d) When dearth rate is greater than birth rate

Chapter 12 - Biodiversity and conservation

1. Select the correct statement about biodiversity [AIPMT MAINS 2012]
a) Large scale planting of Bt cotton has no adverse effect on biodiversity.
b) Western Ghats have a very high degree of species richness and endemism
c) Conservation of biodiversity is just a fad pursued by the developed countries
d) The desert areas of Rajasthan and Gujarat have a very high level of desert animal species as well as numerous rare animals

2. Sacred groves are specially useful in[AIPMT MAINS 2012]
a) Preventing soil erosion
b) Year-round flow of water in rivers
c) Conserving rare and threatened species
d) Generating environmental awareness

3. The highest number of species in the world is represented by [AIPMT PRE 2012]
a) Fungi b) Mosses c) Algae d) Lichens

4. Which of the following is not used for ex situ plant conservation? [AIPMT PRE 2012]
a) Field gene banks b) Seed banks
c) Shifting cultivation d) Botanical gardens

5. In which of the following both pairs have correct combination? [AIPMT 2015]
a) In situ conservation: National Park
Ex situ conservation: Botanical Garden
b) In situ conservation: Cryopreservation
Ex situ conservation: Wildlife Sanctuary
c) In situ conservation: Seed Bank
Ex situ conservation: National park
d) In situ conservation: Tissue culture
Ex situ conservation: Sacred groves

6. Cryopreservation of gametes of threatened species in viable and fertile condition can be referred to as [AIPMT 2015]
a) In situ conservation of biodiversity
b) Advanced ex situ conservation of biodiversity
c) In situ conservation by sacred groves
d) In situ cryo-conservation of biodiversity

7. The species confined to a particular region and not found elsewhere is termed as [RE-AIPMT 2015]
a) Alien **b) Endemic** c) Rare d) Keystone

8. Which of the following National Parks is home to the famous musk deer or hangal? [NEET-II, 2016]
a) Bandhavgarh National Park, Madhya Pradesh
b) Eaglenest Wildlife Sanctuary, Arunachal Pradesh
c) Dachigam National Park, Jammu & Kashmir
d) Keibul Lamjao National Park, Manipur

Chapter 13 - Environmental Issues

1. DB is a standard abbreviation used for the quantitative expression of [AIPMT PRE -2010]
a)The density of bacteria in a medium
b) A particular pollutant
c) The dominant bacillus in a culture
d) A certain pesticide
