is encouraged to produce products which are usually imported from foreign countries i.e. import substitute goods, it can help the country save precious foreign exchange. The comfortable foreign exchange reserve position is more likely to address the adverse balance of payment position if any.

5. Full utilisation of Latent Resource

Promotion of entrepreneurship across the country leads to better utilisation of economic, human, material and natural resources which would remain otherwise unutilised in a country. In other words, establishment of small, medium and micro enterprises all over the country paves way for harnessing all latent resources in the country.

6. Reduction of Concentration of Economic Power in Few hands

Promotion of entrepreneurship by encouraging small, medium and micro enterprises prevents the concentration of economic power in the hands of few large entrepreneurs. It promotes faster industrialisation and brings about equitable distribution of wealth in the society.

7. Better Standard of Living

Entrepreneurs provide a lot of well being measures to their employees besides paying salaries and wages. This unmistakably helps employees upgrade their standard of living. Some of entrepreneurs who have genuine concern for the welfare of the general public, supply goods of good quality at fair price. This in turn helps consuming public save more money and spends liberally on comfort and convenience goods which are supposed to enhance the standard of living of the general public. Higher standard of living brought about by entrepreneurship narrows down the gap between haves and have nots.
