(3) Redemption ability

(4) Registration of Instrument

1. On the basis of convertibility, Debentures may be classified into following categories:

(i) Non Convertible Debentures (NCD): These instruments retain the debt character and cannot be converted into equity shares.

(ii) Partly Convertible Debentures (PCD): A part of these instruments are converted into Equity shares in the future at notice of the issuer. The issuer decides the ratio for conversion. This is normally decided at the time of subscription.

(iii) Fully convertible Debentures (FCD): These are fully convertible into Equity shares at the issuer's notice. The ratio of conversion is decided by the issuer. Upon conversion the investors enjoy the same status as ordinary shareholders of the company.

(iv) Optionally Convertible Debentures (OCD): The investor has the option to either convert these debentures into shares at a price decided by the issuer/agreed upon at the time of issue.

2. On the basis of Security, debentures are classified into:

(A) Secured Debentures: These instruments are secured by a charge on the fixed assets of the issuer company. So if the issuer fails on payment of either the principal or interest amount, such fixed assets can be sold to repay the liability to the investors.

(B) Unsecured Debentures: These instrument are unsecured in the sense that if the issuer defaults on payment of the interest or principal amount, the investor has to be included as unsecured creditors of the company.

3. On the basis of Redeemability, debentures are classified into:

(A) Redeemable Debentures: It refers to the debentures which are issued with a condition that the debentures will be redeemed at a fixed date or upon demand, or after notice, or under a system of periodical drawings. Debentures are generally redeemable and on redemption these can be reissued or cancelled.

(B) Perpetual or Irredeemable Debentures: A Debenture, in which no specific time is specified by the companies to pay back the money, is called an irredeemable debenture. The debenture holder cannot demand repayment as long as the company is a going concern. Issuing company has to pay interest periodically. But all debentures, whether redeemable or irredeemable become payable on the company going into liquidation. However, after the commencement of the Companies Act, 2013, now a company cannot issue perpetual or irredeemable debentures.

4. On the basis of Registration, debentures may be classified as

(A) A Registered Debentures: Registered debentures are issued in the name of a particular person, whose name appears on the debenture certificate and who is registered by the company as holder on the Register of debenture holders.

(B) Bearer debentures: Bearer debentures on the other hand, are issued to bearer, and are negotiable instruments, and so transferable by mere delivery like share warrants.
