(ii) Rights Issue:

When an existing company wants to raise additional capital, securities are first offered to the existing shareholders on a pre-emptive basis. It is called rights issue.

(iii) Private Placement:

Private placement is a way of selling securities privately to a small group of investors.

II Secondary Market

Secondary Market may be defined as the market for old securities, in the sense that securities which are previously issued in the primary market are traded here. The trading takes place between investors who follow the original issue in the primary market. It covers both stock exchange and over-the counter market.

5.04 Functions of Capital Market

Capital market has a crucial significance to capital formation. For a speedy economic development adequate capital formation is necessary. The significance of capital market in economic development is explained below:-

(i) Savings and Capital Formation

In capital market, various types of securities help to mobilize savings from various sectors of population (Individuals, Corporate, Govt., etc.). The twin features of reasonable return and liquidity in stock exchange are definite incentives to the people to invest in securities. This accelerates the capital formation in the country.

(ii) Permanent Capital

The existence of a capital market/stock exchange enables companies to raise permanent capital. The investors cannot commit their funds for a permanent period but companies require funds permanently. The stock exchange resolves this dash of interests by offering an opportunity to investors to buy or sell their securities, while permanent capital with the company remains unaffected.

(iii) Industrial Growth

The stock exchange is a central market through which resources are transferred to the industrial sector of the economy. The existence of such an institution encourages people to invest in productive channels. Thus it stimulates industrial growth and economic development of the country by mobilizing funds for investment in the corporate securities.

(iv) Ready and Continuous Market

The stock exchange provides a central convenient place where buyers and sellers can easily purchase and sell securities. Easy marketability makes investment in securities more liquid as compared to other assets.

(v) Reliable Guide to Performance

The capital market serves as a reliable guide to the performance and financial position of corporate, and thereby promotes efficiency.

(vi) Proper Channelization of Funds

The prevailing market price of a security and relative yield are the guiding factors for the people to channelize their funds in a particular company. This ensures effective utilisation of funds in the public interest.

(vii) Provision of Variety of Services

The financial institutions functioning in the capital market provide a variety of services such as grant of long term and medium term loans to entrepreneurs, provision of underwriting facilities, assistance in promotion of companies, participation in equity capital, giving expert advice etc.

(viii) Development of Backward Areas

Capital Markets provide funds for projects in backward areas. This facilitates economic development of backward areas.
