used to find the suitability of a candidate for a given job role.

1. Aptitude test

Aptitude test is a test to measure suitability of the candidates for the post/ role. It actually measures whether the candidate possess a set of skills required to perform a given job. It helps in predicting the ability and future performance of the candidate. Aptitude test can be measured by the following ways:

i) **Numerical Reasoning Test** - Numerical reasoning test provides information about candidate's numerical aptitude. In other words this test measure the candidate's ability to make correct decision from numerical data.

ii) **Verbal Reasoning Test** - It measures the candidate's ability to comprehend the written text and ability to arrive at factual conclusion from the written text.

iii) **Inductive Reasoning Test** - Inductive Test is one of the psychometric tests conducted in the selection process to measure the problem solving abilities and ability to apply logical reasoning.

iv) **Mechanical Reasoning Test** - This test measures the engineering student's ability to apply engineering concepts in actual practice.

v) **Diagrammatic Reasoning Test** - This test measures the candidate's ability to understand the shapes, abstract ideas and ability to observe and extract values from illustrations and apply them to new samples.

vi) **Spatial Reasoning Test** - The test measures the candidate's ability to clearly manipulate and remember the shapes, still images, and find out pattern which govern the sequence.

vii) **Situational Judgment Test** - This test measures the candidate's ability to choose the most desirable action in critical situations using his judging ability.

viii) **Mental Arithmetic Test** - It tests the candidate's basic numerical ability like addition, subtraction, multiplication, division and fraction. It tests the speed of doing calculation.

ix) **Vocabulary Test** - The test measures candidate's ability to recognize the relationship among the ideas, think methodically and fluency in English language.

x) **Number Sequence Test** - This measures the candidate's ability to find a logic in a series or pattern. Under this test, candidates have to find out missing number in a sequence to determine the pattern.

2. Achievement Test

This test measures a candidate's capacity to achieve in a particular field. In other words this test measures a candidate's level of skill in certain areas, accomplishment and knowledge in a particular subject. The regular examination conducted in educational institution represents achievement test. It is also called proficiency test. This test is conducted before, during or after a learning experience. In short it is a test conducted to find out candidate's mastery over the subject. Example,

a) A driver may be asked to drive a vehicle to test his driving efficiency

b) Music student may be asked to play a given instrument

c) Teacher candidate may be asked to give a demonstration

3. Intelligence Test

Intelligence tests are one of the psychological tests, that is designed to measure a variety of mental ability, individual capacity of a candidate. The main aim of these tests is to obtain an idea of the person's intellectual potential.
