Methods of sequencing

1. Sanger dideoxy (primer extension/ chain-termination) method

Most popular protocol for sequencing, very adaptable, scalable to large sequencing projects.

2. Maxam-Gilbert chemical cleavage method

DNA is labelled and then chemically cleaved in a sequence dependent manner. This method is not easily scaled and is rather tedious.

It provides an important tool for determining the thousands of nucleotide variations associated with specific genetic diseases, like Huntington's, which may help to better understand these diseases and advance treatment.

Summary

Microorganisms (or microbes) inhabiting every corner of the globe, are indispensable to life on Earth and are responsible for some of the deadliest human diseases and form the basis of many industrial processes. Microbiology, an organismal discipline concerned with the properties of small forms of life or microorganisms. Microbes could help solve crimes. Arriving in space without any protection, microorganisms are confronted with an extremely hostile environment, characterized by an intense radiation field of galactic and solar origin, high vacuum, extreme temperatures, and microgravity. Emerging infection is defined as those infections whose incidence in humans has increased in the past two decades or will increase in the future. It can be new, reemerging, drug resistant infections. This condition associated with many chronic diseases, including diabetes, Lupus multiple sclerosis symptoms of leaky gut are bloating, gas, cramps, inflammatory bowel disease, fatigue, food sensitivities, join pain, moodiness, irritability, sleepless, skin problem and eczema, psoriasis.

Multiple choice questions

YPYCVT

1. Size of the Nono particles varies from
   a. Less than 10nm
   b. 100nm or less
   c. 100nm or more
   d. none of these
2. _____ is an example for optical imaging technique
   a. CLSM b. LCSM
   c. both a and b d. TEM
3. First genetically produced animal by cloning technique is _____
   a. Shally b. Dolly c. bally d. Vally
4. EHF stands for _____
   a. Ebola hemorrhagic fever
   b. Ebola heart fever
   c. Ebola human fever
   d. none of these
5. ISS stands for _____
   a. International space station
   b. Indian space station
   c. Indian standard system
   d. None of these
