16. Free hand method

17. $a = 169.428$; $b = 3.285$; $Y = 169.428 + 3.285\ X$

18. $a = 54$; $b = 5.4$; $Y = 54 + 5.4\ X$

When $X = 2000$, $\hat{Y} = 54 + 5.4\ (2000\text{-}2002) = 43.2$

When $X = 2001$, $\hat{Y} = 54 + 5.4\ (2001\text{-}2002) = 48.6$

When $X = 2002$, $\hat{Y} = 54 + 5.4\ (2002\text{-}2002) = 54$

When $X = 2003$, $\hat{Y} = 54 + 5.4\ (2003\text{-}2002) = 59.4$

When $X = 2004$, $\hat{Y} = 54 + 5.4\ (2004\text{-}2002) = 64.8$

19. Semi- Average I = 276.666

Semi- Average II = 213.333
