Chapter 6

Mystery and Adventure

Mission Impossible

V513HZ

Warm Up

a. The pictures given above are places of mystery. Find out where they are and what is mysterious in these places.

b. It is scientifically proved that solving detective riddles everyday will develop your reasoning skill. Now put on your thinking hat and solve the riddles given below logically.

1) A detective comes to a crime scene. A man is said to have jumped out of a window of an abandoned building and committed suicide. The detective goes inside the building to the first floor, to the room at the front. He goes up to the window through which the man had jumped, opens it and looks at the dead man. Then he goes to the second floor and does the same. He continues until he has visited all the floors and repeated the action. Then he returns to his team and says that it's by no means a suicide, but a murder. ***How did he find it out?***

2) Two young ladies stopped at a fresh fruit juice stall and ordered sweet lime juice with ice. One of them was very thirsty and drank very fast and ordered one more. She had two glasses during the time, the other drank only one. Tragically the girl who was drinking the juice slowly dies while the other stayed alive. But it turned out that all the drinks they had been served contained poison. ***How is it possible that the girl who drank more survived ?***

Answers

1) When a person commits suicide by jumping out of a window, he doesn't tend to close the window behind him. But in this case, none of the windows which faced the dead man were left open. It means that the man wouldn't have jumped out of the window.

2) In fact, the poison was in the ice. The young lady who escaped death drank the juice before the ice cubes could melt completely. But the ice cubes in the other lady's drink melted completely, releasing the poison into the juice.
