rolling uphill and people leaning farther than normally possible without falling down.

The mystery spot was discovered in 1939 by a group of surveyors and was opened to the public in 1940. The Mystery Spot has amazed and perplexed hundreds and thousands of visitors from all over the world.

Some speculate that cones of metal were secretly brought here by aliens and buried in the earth as guidance systems of their spacecraft. Some think it is in fact, the spacecraft itself buried deep within the ground. Other theories include carbon dioxide permeating from the earth, a hole in the ozone layer, a magma vortex and the highest dielectric bio cosmic radiation. Whatever the cause is, it remains a mystery.
