sailors were privileged to gaze at that first panorama of the Pacific Ocean. Those who remained crossed the meridian now known as the international Date Line in the early spring of 1521 after 98 days on the Pacific Ocean. During those long days at sea, many of Magellan's men died of starvation and disease.

Later, Magellan became involved in an insular conflict in the Philippines and was killed in a tribal battle. Only one ship and 17 sailors under the command of the Basque navigator Elcano survived to complete the westward journey to Spain and thus prove once and for all that the world is round, with no precipice at the edge.

1. The 16th century was an age of great _____ exploration.
   a) Cosmic
   b) land
   c) mental
   d) None of the above

2. Magellan set sail to prove that the East Indies fell under _____
   a) French territory
   b) Spanish territory
   c) English territory
   d) African territory

3. The meridian is now known as the _____
   a) International Date Lime
   b) International Time zone
   c) Equator
   d) Latitude

4. Only _____ survived to complete the westward journey to spain
   a) Two ships and fifteen sailors
   b) Three ships and seventeen sailors
   c) One ship and ten sailors
   d) One ship and seventeen sailors

5. This journey proved that the _____
   a) World is round
   b) World is round with no precipice at the edge
   c) World is round with precipices
   d) World is round with edge

Passage - 5

Marie Curie was one of the most accomplished scientists in history. Together with her husband, Pierre, she discovered radium, an element widely used for treating cancer, and studied uranium and other radioactive substances. Pierre and Marie's amicable collaboration later helped to unlock the secrets of the atom.

Marie was born in 1867 in Warsaw, Poland, where her father was a professor of physics. At an early age, she displayed a brilliant mind and a blithe personality. Her great exuberance for learning prompted her to continue with her studies after high school. She became disgruntled, however, when she learned that the university in Warsaw was closed to women. Determined to receive a higher education, she defiantly left Poland and in 1891 entered the Sorbonne, a Fresh university, where she earned her master's degree and doctorate in physics.
