Marie was fortunate to have studied at the Sorbonne with some of the greatest scientists of her day, one of her day, one of whom was Pierre Curie. Marie and Pierre were married in 1895 and spent many productive years working together in the physics laboratory. A short time after they discovered radium, Pierre was killed by a horse – drawn wagon in 1906. Marie was stunned by this horrible misfortune and endured heartbreaking anguish. Despondently she recalled their close relationship and the joy that they had shared in scientific research. The fact that she had two young daughters to raise by herself greatly increased her distress.

Curie's feeling of desolation finally began to fade when she was asked to succeed her husband as a physics professor at the Sorbonne. She was the first woman to be given a professorship at the world-famous university. In 1911 she received the Nobel Prize in chemistry for isolating radium. Although Marie Curie eventually suffered a fatal illness from her long exposure to radium, she never became disillusioned about her work. Regardless of the consequences, she had dedicated herself to science and to revealing the mysteries of the physical world.

Questions.

1. The Curies' _____ collaboration helped to unlock the secrets of the atom
   a) Friendly
   b) Competitive
   c) industrious
   d) courteous
2. Marie had a bright mind and a _____ personality
   a) Strong
   b) Humorous
   c) blithe
   d) strange
3. Marie left Poland and travelled to France to enter the _____
   a) University in Warsaw
   b) University in Poland
   c) Sorbonne
   d) University in Austria
4. She received the Nobel Prize in _____
   a) Physics
   b) Chemistry
   c) Astronomy
   d) Astro Physics

Passage – 6

When Andrew Carnegie came to America from Scotland, he was just a lad. He started out by running errands and ended up as one of the largest steel manufactures in the United States.

Someone once asked Mr. Carnegie how he dealt with people. Andrew Carnegie replied, "Dealing with people is a lot like digging for gold. When you go digging for an ounce of gold, you have to move tons of dirt. But when you go digging, you don't go looking for the dirt, you go looking for the gold."
