Add Drainage Layers: To create a false drainage layer, fill the bottom with pebbles so that water can settle and does not flood. The depth of the pebbles depends on the size of the container.

Add the Activated Charcoal: Cover the pebbles with charcoal to improve the quality of the terraria by reducing bacteria, fungi and odors.

Add Soil: Add enough soil so that the plant roots will have enough space to fit and grow.

Plant: Select the desired plant such as, *Caralluma spp, Asperagus spp, Portulaca spp, Begonia spp,* and *Chlorophytum spp*; trim the roots if they are too long. Dig a pit using a stick, and place the plants' roots in it. Add more soil around the top and compact the soil down around the base of the plant. Place little plants in the container and try to keep them away from the edges of the container, so that the leaves do not touch the sides. After planting add accessories like a layer of moss (dried or living), little figurines (old toys, glass beads, stones) or a layer of miniature rocks. This is the little green world

Cleaning and Watering: Wipe if there is any dirt along the sides of the container. Give the terrarium a little bit of water and enjoy the beautiful miniature living world on your table or in your living room.

Ready made terrariums can fetch a good price as indoor garden objects or as gift articles.

BONSAI

Bonsai is a Japanese art form using miniature trees grown in containers that mimic the shape and scale of full size trees.

How do you make a Bonsai tree?

Visualize the finished product of bonsai while selecting a plant species and the pot.

1 Plug out the sapling and clean and prune the roots.

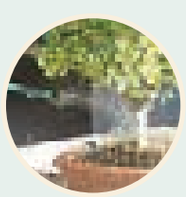

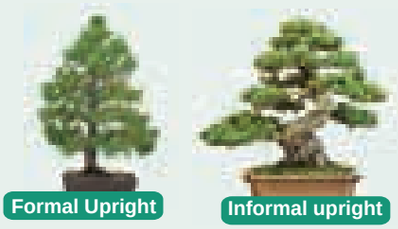

2 Prepare the pot and position the tree in it

3 After re-potting leave the plant in a semi shaded area until the roots have re-established.
